## Education Background

|                                                 |              |                 |
|-------------------------------------------------|--------------|-----------------|
| Singapore Management University (Undergraduate) | Econometrics | 2024.08-2028.08 |
|-------------------------------------------------|--------------|-----------------|

## Honors and Rewards

**Scholarships:** Li Ka-Shing Endowed Scholarship

**Competitions:** Ungptable Challenge Semifinals, translation works archived by official website

## Internship Experiences

|                                                 |                      |                 |
|-------------------------------------------------|----------------------|-----------------|
| Jiangsu Shengkun Investment Management Co. Ltd. | Investment Associate | 2025.12-2026.02 |
|-------------------------------------------------|----------------------|-----------------|

- Participated in full-scope due diligence for a prospective investment, conducting PMSM industry research and upstream and downstream interviews, performing revenue walkthroughs based on management meetings, reviewing on-site contracts and regulatory qualifications, identifying a material legal risk, and supporting the preparation of meeting summaries and the final due diligence report.

## Scientific Competitions

|                                                  |      |                 |
|--------------------------------------------------|------|-----------------|
| Blockchain-based Anti-Greenwashing System Design | Lead | 2025.08-2025.10 |
|--------------------------------------------------|------|-----------------|

- Designed and implemented a blockchain-based anti-greenwashing ESG disclosure system, enabling real-time on-chain upload of ESG data generated from IoT devices, along with timestamp anchoring and audit traceability. Selected as a winning team in the *Ungptable Challenge*.

|                                                     |      |                 |
|-----------------------------------------------------|------|-----------------|
| Brand Visibility Optimization via Generative Search | Lead | 2025.06-Present |
|-----------------------------------------------------|------|-----------------|

- Developed an experimental methodology to quantify and optimize brand exposure under generative search engines (GEO), collaborating with a research group at Princeton. Currently validating the effectiveness of optimized exposure strategies.

|                                                         |             |                 |
|---------------------------------------------------------|-------------|-----------------|
| Long-term Commuting Cost Study of Singaporean Graduates | Participant | 2024.08-2025.01 |
|---------------------------------------------------------|-------------|-----------------|

- Used Google Map API and district-level graduate density data to investigate long-term commuting costs across Singapore, analyzing cost and opportunity trade-offs between commuting modes.

## Other Achievements

|                                                 |            |                 |
|-------------------------------------------------|------------|-----------------|
| Translation of <i>Naples</i> by Walter Benjamin | Translator | 2024.08-2025.04 |
|-------------------------------------------------|------------|-----------------|

- Completed a full translation of the original text, producing the first and only complete Chinese edition, which was archived by official website.

## Personal Skills

**Full-stack Prototyping Basics:** Node.js + Express backend; HTML/CSS/JS frontend; Polygon / ethers.js smart contract interaction

**Data Analysis:** Python (pandas), R, SQL, Excel processing and visualization

**AI Development:** Skilled in using APIs from major platforms; capable of building LLM systems independently

**Financial Accounting:** Journal entries, T-accounts, adjusting entries, depreciation, deferrals; able to explain disclosure requirements under IFRS

**Working Languages:** English (TOEFL 100+, DET 135, SAT 1400+), Japanese

**Others:** Manage a WeChat public account; proficient in video/audio editing tools (Premiere, Audition, CapCut)
